## REDISTRIBUTION ORDER/READY FOR ISSUE PROJECT – NAVY TRANSPORTATION – NON-CAV (FEB 2002)

### *RDO/RFI - NON CAV*

*NOTE: The RDO/RFI Project will be implemented in the near future. When this occurs, current Section F – DELIVERIES OR PERFORMANCE shall be replaced with the proper CAV or non-CAV RDO/RFI Section F – DELIVERIES OR PERFORMANCE...REDISTRIBUTION ORDER/READY FOR ISSUE PROJECT – NAVY TRANSPORTATION that is included herein.*

The Navy has developed a process to obtain Advanced Traceability and Control (ATAC) of NAVCIP owned Depot Level Repairables (DLRs). This process provides a single transportation carrier contracted by the Navy who is responsible for the delivery and pickup of all DLRs to and from repair facilities.

Assets to be delivered to your facility covered by this agreement will include and DLR in any condition. Assets to be picked up from your facility will include DLRs in any of the following conditions:

- units that have been repaired and are Ready for Issue (“A” condition)
- units that have been determined Beyond Repair (“H” condition)
- units that are either Beyond Economical Repair or are not authorized for repair – Not Ready for Issue (“F” condition)
- units that have been misidentified or misdirected to the facility (“J” condition)

Upon completion of repair of a unit, upon direction/confirmation from the PCO that the unit is Beyond Repair (BR) or Beyond Economical Repair (BER) by modification to the individual delivery order AND THE UNIT THAT IS BR OR BER IS TO BE RETAINED AT THE DEFENSE DISTRIBUTION DEPOT, the repair facility shall:

- (1) Contact the Government Quality Assurance Representative (QAR) to schedule an on-site visit date for inspection/acceptance of the material including signature of the DD250, which is required for payment purposes.
- (2) Contact Navy Transportation (NAVTRANS) dispatcher at 1-800-CAL-ATAC to advise that the material is ready for shipment. The repair facility must have the following information available. The ATAC database will house much of this information but the repair facility will be asked to verify some of the data:
  - a. Contract Number (i.e. N0010499GA099)
  - b. Delivery Order Number (i.e. 5000)
  - c. Contract Line Item Number (i.e. 0001AA)
  - d. Quantity (i.e. 10)
  - e. Pieces (number of boxes)
  - f. Weight
  - g. Cube
  - h. CAGE
  - i. Condition Code of material (i.e. “A”, “F”, “H”, or “J”)
  - j. Destination Unit Identification Code (UIC) (i.e. N00189)

- k. Destination Address
- l. Hazardous Material (Yes or No)
- m. Pick Up Address
- n. Nomenclature
- o. Available Pick Up Date (date material can be picked up after QAR inspection)

NAVTRANS will prepare and telefax a DD1348-1 to the repair facility for each quantity of one with a MILSTRIP document number assigned to each individual unit to be used as the shipping document. The Contract Number, Delivery Order Number, and Contract Line Item Number will be referenced in the remarks block of the DD1348-1A to identify to the repair facility which MILSTRIP document number belongs to each unit.

- (3) Affix one copy of the DD1348-1A telefax from NAVTRANS to the outside of the shipment container and one copy of the DD1348-1A inside the shipment container for each unit. The QAR will ensure that a copy of the DD1348-1A is located both inside and outside the shipment container as part of their inspection/acceptance of the material. **DO NOT INCLUDE A DD250 WITH THE MATERIAL. THE DD250 IS FOR PAYMENT PURPOSES ONLY.**

Assets which are CLASSIFIED, HAZARDOUS, or SECURITY CODED are excluded from the ATAC process and will continue to be shipped under the current method with the issuer scheduling the transportation.
