STARR/PC

SUPPLY
TRACKING
AND
REPARABLE
RETURN

A PC-based tool providing the international customer a two way exchange of Security Assistance information with the U.S. military services and DOD's FMS management systems.

STARR/PC CUSTOMERS SEND FMS TRANSACTIONS TO THE US SERVICE:

- ◆ Requisitions
 - ◆ Stock Numbered Items (A01)
 - ◆ Publications (Service Unique)
 - ◆ Part-Numbered Items with Technical Data and Remarks (A05)
- ◆ Follow-Ups
- ◆ Cancellation & Modification Requests
- ◆ Material Receipts
- ◆ Reports of Discrepancy (RODs)

STARR/PC CUSTOMERS RECEIVE FMS DATA FROM THE US SERVICE:

- ◆ Supply & Shipment Status
 - ◆ New *“Master Record”* when transaction status changes in CISIL/MISIL/SAMIS
 - ◆ Contract Accounting Deliverable data for US Navy FMS cases
- ◆ Freight Tracking information from the customer’s Freight Forwarder (FF) for customers participating the Freight Tracking Program
 - ◆ When FF receives material from US
 - ◆ When FF ships material to the FMS customer
- ◆ ROD Status
- ◆ Financial Data at the Case Line Level (Weekly)
 - ◆ Total Line Value
 - ◆ Obligational Authority (OA)
 - ◆ Uncommitted OA
 - ◆ Commitments & Obligations
 - ◆ Expenditures

STARR/PC FMS DATA QUERIES & REPORTS:

- ◆ Any *Specific Requisition* (Reqn)
- ◆ *All Reqs* for a specific
 - ◆ Stock Number
 - ◆ Transportation Control Number (TCN)
 - ◆ Contract
 - ◆ Case
- ◆ All *Reqs Due-In* (No receipt or cancellation)
- ◆ All *Reqs Received* by the Freight Forwarder for customers participating in the Freight Tracking Program
- ◆ All *NMCS/CASREP* Reqs
- ◆ Case Line *Financial Summaries* (Weekly)
- ◆ All *Open RODs*

STARR/PC IS USER FRIENDLY AND EASY TO OPERATE

- ◆ Customer dials up DAASC using DAMES/ILCS
- ◆ When DAASC connection is established, data is automatically exchanged between the customer and CISIL/MISIL/SAMIS
- ◆ Connection is automatically ended when data exchange is completed
- ◆ Updated Customer Database, with current status, now available for customer initiated queries and reports
- ◆ CISIL/MISIL/SAMIS process all inputs received from the customer during data exchange

STARR/PC

- ◆ Developed by the US Air Force; Supported by the US Army, Navy and Air Force.
- ◆ Approved by Defense Security Assistance Agency (DSAA) as a Standard Interface into DOD’s automated FMS management systems.
- ◆ Allows the international customer to send requisitions and other FMS transactions directly to the appropriate U.S. military service and FMS Management System. US Army ⇄ CISIL; US Navy ⇄ MISIL; US Air Force ⇄ SAMIS.
- ◆ Establishes, on the customer’s PC, a database of CISIL/MISIL/SAMIS FMS information available for locally initiated queries and reports.
